

TYRE-SMART - REFINEMENT OF WHEEL ALIGNMENT

The Wheel Alignment on your vehicle should be checked annually or every 12,000-15,000 miles. Alignment on your vehicle should also be checked whenever new tyres are fitted, or suspension and steering components are replaced. Wheel alignment can be knocked out of line by impacting major road hazards such as pot holes.

Another sign of misalignment will be uneven tyre wear, an off-centre steering wheel or a pulling sensation of your vehicle to one side. Excessive tyre noise is another indicator. Some vehicles only have front toe adjustments, but a lot of vehicles on the road today have rear toe adjustments,

Got a problem with your tyres or want to know more about “wheel alignment” – The Tyre Smart team are here to help

plus camber and caster adjustments. be it toe, camber, or caster.

Did you know 58% of cars suffer misalignment on the rear wheels? This means that by just having a front alignment done, you will not detect and therefore solve the problem on a vehicle with incorrect rear adjustment.

Whatever your alignment needs, here at Tyre-Smart we pride ourselves in our ‘Alignment Programme’ run by Jack Green. We do alignment work for various main dealers, race cars, sports cars, super cars and every day run of the mill cars. We weight vehicles when needed and are able to carry out any adjustment required,

At Tyre Smart we use the Hawk Eye hunter Alignment machine, complete with a state of the art alignment ramp. All our technicians have been trained and certified by Hunter. They are also very experienced having carried out thousands of wheel alignment procedures over the years.

If you would like to improve your vehicle’s handling, reduce its fuel consumption and prevent excessive tyre wear, call the Tyre-Smart team today at 6 Moss Road, Witham CM9 3UQ, www.tyre-smart.com TELEPHONE: 01376 511177
